Harmon
Dear Dr. McAllister:

For your information I am enclosing the final program for the 1989 Gordon Research Conference on Drug Metabolism. The program and application form will appear in the March 3 issue of SCIENCE. I hope that you will be able to attend. Please distribute copies to your colleagues who might be interested in attending.

We were able to develop our program early and I think that, due to the cooperation of all involved, it should be a very interesting Conference. In 1989 the Conference will address issues regarding the role of drug metabolism in the design of better therapeutic drugs, mechanisms of drug toxicity, the relationship between drug metabolism studies in experimental animals and human drug metabolism, basic mechanisms of drug transport and drug metabolism, and other topics. With regard to the financial support needed to put on the meeting, you might be interested to know that in recent years grant applications submitted to the National Institutes of Health have not fared well due to changes in policy despite receiving excellent priority scores. Fortunately, industry has been very supportive of the Conference in recent years and funding has not been a major obstacle. I hope that this trend will continue and support from your organization will be greatly appreciated.

Please contact me (313) 577-1580 if you would like any further information concerning the Conference. With best regards.

Sincerely,

Paul F. Hollenberg, Ph.D.
Chairman, 1989 Gordon Research
Conference on Drug Metabolism
